SKILLS

- Unity / C#
- Unreal Engine / C++
- Git / GitHub
- Java, Python, SQL, HTML

PROFILE

Game programmer with professional experience in commercial game development at Skydome Entertainment. Specialized in gameplay and systems programming, with experience developing combat systems, save/load and persistence, UI, and other technical features. Strong in practical problem solving and building reliable systems that support enjoyable player experiences.

WORK EXPERIENCE

Skydome Entertainment

(Feb 2024 - Current)

Lead Programmer | Abyssian (upcoming 2.5D RPG, Unity/C#)

- Led implementation of turn-based combat and token/status effect systems.
- Built save/load and scene persistence.
- Implemented equipment systems and world map/minimap UI.

Programmer | The Hive (Steam, strategy game, Unity/C#)

- Post-release fixes and system improvements across gameplay and UI.
- DLC feature implementation, including autosaving and group selection UI.

Supported trainee onboarding and code reviews during production.

EDUCATION

Tampere University of Applied Sciences (TAMK)

BBA, Game Development Track - Graduated Dec 2025

Thesis: Design and Implementation of a Turn-Based Combat System using Unity

Ahlman's Game Programming Course

Game Programmer - Aug 2018 - Aug 2019

PROJECTS

Culinary Carnage (itch.io, Unity/C#)

- 2D top-down roguelike: implemented enemy and boss AI using FSM-style behavior.
- Built enemy/boss ability system to support varied attacks and encounter pacing.

Steel & Bone (Steam, Unity/C#)

- Co-code lead; contributed to player movement, skills, enemy AI, and animation integration.

Museum Mayhem (Mobile, client, Unity/C#)

- Implemented escape room puzzles and point-and-click room navigation for Tampere Art Museum.
